

At Cloughwood Academy, we are committed to ensuring that every pupil transitions successfully into further education, training, employment, or other positive destinations. We work collaboratively with local authorities, alumni, further education providers, training organisations, and employers to track and support the destinations of all our pupils. This partnership approach enables us to maintain a comprehensive understanding of each pupil’s pathway and provide tailored support to facilitate smooth transitions.

Our destination tracking system captures detailed information on pupils’ progression into full-time education, apprenticeships, employment with training, and other forms of engagement that support lifelong learning and personal development. This data informs our continuous improvement strategies and helps us tailor transition support to individual needs.
